# SKIN & SCUBA DIVING EQUIPMENT

**The Recognized Leader in  
Quality Equipment for  
The Underwater Sportsman**

3659 Seventh Avenue, Los Angeles 18, Calif.  
Philadelphia, Pennsylvania; Chicago, Illinois

When I accepted the position as Director of sports diving research and development at Healthways, I was motivated by the increasing specialization of underwater equipment and a desire to bring to divers everywhere the finest, most advanced, most thoroughly tested equipment in existence.

It has been a long time since the only equipment a diver used was a mask and hand spear. There has been great progress since those days but there are still many problems to be solved. At Healthways now, there are three particular projects in which we are hard at work on research and development.

First, and most important, is further development of the Self Contained Underwater Breathing Apparatus. There is a vital need for units that will permit us to stay under water longer and operate at greater depths. Our regulators this year will be completely new . . . combining greater ease of operation and safety factors never before available.

Second, there is the problem of underwater communication. "The Silent World" is a very poetic phrase but now we must break the silence and talk underwater. The added safety and convenience brought about by use of Healthways' new underwater communications system will be a giant step forward in underwater sport.

The third problem is underwater transportation. We need an underwater vehicle that is safe, comfortable and easy to maneuver. I believe you will agree when you see Healthways' answer to this problem that all three of these requirements have been met.

Healthways is developing equipment that solve not only these problems but many, many others.

Safety in diving equipment is an absolute requirement. All our products will be developed with this most important factor in mind. I personally will supervise the rigid and thorough testing of all equipment, not only for safety but for perfect functioning and dependable service.

As a pioneer diver who likes his fellow divers, I assure you that all items offered for sale by Healthways will be the finest, most advanced and most thoroughly tested equipment in existence.

(Internal Rubber Powered)  
Retail \$19.95

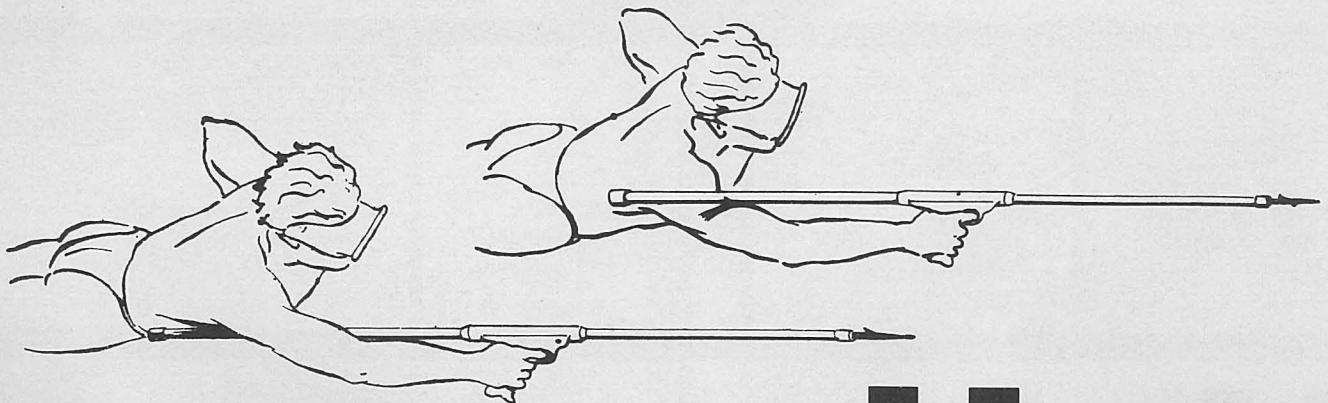

Only 34" in length, the Deluxe Mignon is easy to handle, charge and operate. Internally rubber powered, this model is ideal for "close-in" work. Constructed of corrosion-resistant anodized metal. Diameter: 0.86", Spear Dia. 0.40".

Imported from Italy, Cressi guns are recognized as the finest in quality, accuracy and power. All guns are complete with spear, spearhead, nylon line and charger. The center pistol grip provides perfect balance for accuracy.

**NO. 1531**  
SAETTA  
(Spring Powered)  
Retail \$24.95

Unusually accurate, highly maneuverable and easily charged, the Saetta is internally spring powered. Non-corrosive construction throughout. Length 45", Dia. 0.66", Spear Dia. 0.39".

Famous the world over for their fine quality these spearheads are interchangeable for all Cressi spears and with the use of No. 1500-10 Adapter may be used on French Arbalette Spearshafts.

# UNDERWATER BREATHING APPARATUS

## THE SCUBAIR SINGLE HOSE TWO-STAGE REGULATOR! THE MOST THOROUGHLY TESTED AND EXPERTLY ENGINEERED SCUBA IN THE HISTORY OF SELF-CONTAINED DIVING!

A minimum of moving parts. The safest, most simple, most compact high-pressure and demand valves. A depth-compensated, automatic, precision air reserve is built into the unit. A high-test nylon and neoprene hose features a swivel-joint connection to the demand regulator. Center opening to diaphragm enabling diver to clear water from unit instantly. Eliminates protruding button that can lead to involuntary loss of air. Air exhaust is channeled so as to give unrestricted exhaling and to prevent air bubbles from obstructing vision. Revolutionary new "Quik-Klip" allows immediate removal of cover to facilitate inspection and maintenance and insures positive seal of diaphragm. All air connections have leakage-preventing "O" Ring seals. Entire unit made of chrome-plated brass with stainless steel springs. Contains attachment for Scubair Pressure Gauge.

UNDERWATER  
BREATHING APPARATUS  
Retail \$77.50

This unit was developed by the veteran underwater engineer Richard E. Anderson, who has used and tested every conceivable type of underwater breathing apparatus. One of the first American Scuba divers, Mr. Anderson has been actively engaged in the design of scientific underwater equipment for many years. His own tests with the SCUBAIR to a depth of 300 feet attest to the mechanical excellence of this unit.

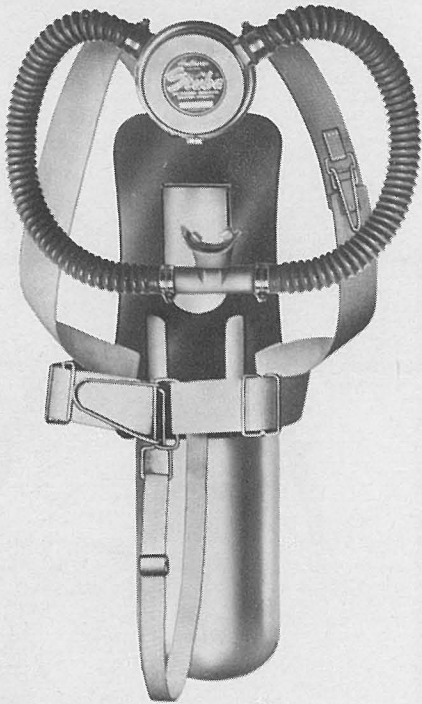

# Scuba

THE SENSATIONAL NEW AIR LUNG

THE MODEL "1960" DELUXE SCUBA is an "all new" product . . . every part has been precision made and engineered to assure maximum efficiency. Each part is made of the finest materials available . . . finest stainless steel, monel, and brass materials have been used exclusively throughout. Built to last . . . there's no possibility of corrosion, electrolysis or other chemical action that would affect the function and utility of the Model "1960" Deluxe SCUBA. One-year factory warranty and lifetime service policy, complete with all details, go with every SCUBA.

A foolproof depth compensated automatic air reserve has been engineered into the regulator itself . . . it will always insure an adequate supply of air to enable the diver to reach the surface. There is nothing to adjust . . . nothing to regulate.

The Model "1960" Deluxe SCUBA has a completely new pressure compensated exhaling valve that assures effortless, equalized exhalation in any position.

### NO. 1612

MODEL "1960" DELUXE SCUBA SELF-CONTAINED UNDERWATER BREATHING APPARATUS

includes:

No. 1611 Scuba Regulator  
No. 1602 Tank (71.2 cu. ft.—2250 p.s.i.—approx. 1 hour cap.)

## SCUBA HARNESS

Completely new design by Richard E. Anderson that combines safety, comfort and utility. The SCUBAPAK is made of a single sheet of specially-compounded corrosion-proof aluminum. A protective smooth-surface coating of resilient high-impact plastic makes the back plate impervious to salt water and the elements. The arrangement of the back plate puts the tank where it should be on the diver's back. The ingenious "continuous strap" arrangement of the harness brings about the most comfortable and secure Scuba harness ever designed. Equipped with Healthways improved Jet-O-Sen quick release buckle and a crotch strap that may be used at the option of the diver. Two easy-to-carry handles, designed as an integral part of the harness, make carrying your Scuba as easy as carrying a suitcase.
